WARREN W. HILTON, - Chief Engineer. REUBEN CORSON, REUBEN CORSON, JOHN H. McKENNA, - - Assistant Engineers.

SEALER OF WEIGHTS AND MEASURES:

EDWIN J. CHANDLER.

SELECTMEN'S REPORT.

CITIZENS:

The ever-moving pendulum of Time marks the advent of that period of the year when those to whom you have confided the management of your affairs are expected to render to you an account of the manner in which they have discharged the duties thus entrusted to them. Accordingly, your Selectmen make the following report.

POLICE.

For the doings of this department we refer you to the report of the Chief.

CEMETERY COMMITTEE.

The Committee appointed by the town, December 30th, 1892, with authority to purchase land for a Town Cemetery, reported to our Board, personally, early in September, that they had carried their work to that stage, where in their opinion it would be for the best interest of the town that the Cemetery Commissioners should take matters in charge. Acting under authority vested in this Board, at a meeting held September 7th, 1892, we appointed the following gentlemen Cemetery Commissioners, for the terms as stated, viz: Charles F. Jenney, term expires April 1893; George E. Whiting, term expires April 1894; George M. Rice, term expires April 1895, and notified the Cemetery Committee of our action, in reply to which we received the following communication:

To the Honorable Board of Selectmen, Town of Hyde Park, Mass

GENTLEMEN: In view of your appointment of Cemetery Commissioners for Fairview Cemetery, as authorized by the Town, and the fact that the authority granted to then by the Town substantially includes that conferred by the Town to the Cemetery Committee, we hereby tender our resignation and desire to report that we have surrendered to the said Commissioners our report of all proceedings of our Committee up to date, plans of surveys, with a detailed statement of all expenditures to date, showing balance on hand of \$1,706.02 for the further development of said Cemetery under supervision.

Respectfully submitted for the Cemetery Committee.

F. N. TIRRELL, Chairman.

Their resignation was accepted and the Committee discharged. The report of the Cemetery Commissioners appears elsewhere.

ACTIONS AT LAW.

The case of Hayes vs. Hyde Park, described in report of last year, reported in 153 Mass. Supreme Court Reports. page 514, which was pending in the Superior Court on plaintiff's motion for a new trial at the time of our last annual report, has since been decided in favor of the town, the motion having been overruled, and a final judgment has been entered in favor of the town.

The petition of Mary A. Eustis on account of betterment assessment on her property in consequence of the construction of Warren Avenue, between Beacon Street and Neponset river, was tried during the May sitting of the Superior Court at Dedham, and a verdict was rendered in favor of the Town for the amount of assessment and interest, sustaining in every respect the validity of the Selectmen's assessment.

The petition of the Board of Selectmen of 1890 to pro-

hibit the County Commissioners from making certain decrees in relation to Metropolitan Avenue, which petition, the circumstances connected therewith and certain proceedings thereon, were fully described in the annual reports of the Selectmen, for years ending January 1891 and 1892. case came on to be heard by a single justice of the Supreme Court in February, 1892, and the question in controversy between the Town and the County Commissioners was reserved by him for the consideration of the full Court, and later it was fully argued before that Court, and on the 23d day of June last, in an elaborate opinion, which may be found in the Northeastern Reporter, Vol. 31, p. 691, it was ordered, for the reasons stated in the opinion, that the petition be dismissed; and thereafter the County Commissioners adjudicated and decreed that Metropolitan Avenue be constructed as a public way between the Old Colony Railroad and Riverside Square.

The case of Mary A. Foster, which was reported as pending at the time of the 1892 Report, was an action for alleged injuries sustained by Mrs. Foster in March, 1891, while travelling on the sidewalk on Fairmount Avenue, between the New York & New England Railroad and the bridge over the Neponset River. She claimed damages in the sum of \$5,000, and final judgment was entered on the verdict. This case came on to be heard during the October sitting of the Superior Court, and after full and protracted trial a verdict was rendered in favor of the Town.

Louis H. Mahan, of Boston, made claims for personal injuries and injuries to his horse and carriage sustained ou Business Street, and placed his claim in the hands of counsel who threatened to bring suit against the Town. Upon investigation we found that Mr. Mahan sustained some injury to his person and to his horse and carriage; we were

advised that the claim was a proper one to adjust, and the same was settled on payment of \$200.

The case of Mary Ann Hobart alluded to in the last annual report and then pending in the Superior Court in Norfolk County, was for an alleged injury sustained on the curbstone in front of No. 6 Fairmount Avenue in April, 1891. She claimed damages in the sum of \$3,000. This suit has been on the trial list for several terms and was reached for trial at the present January sitting of the Superior Court. After some negotiations, the suit was disposed of by entry of "neither party," thus saving the Town harmless.

Sarah S. Fuller, of Boston, brought an action against the Town which is now pending in the Superior Court, Norfolk County, and may be reached for trial at the May sitting of that Court. She claimed damages in the sum of \$4,000, for injuries alleged to have been sustained on Central Park Avenue or Hyde Park Avenue, near the junction of these avenues.

William H. Ruddick, of Boston, brought a suit against the Town, entered in the Superior Court in January, 1893, which suit is now pending, and may be reached for trial at the May sitting, in which he claims damages in the sum of \$1,500, for personal injuries and injuries to his horse, sleigh and harness, alleged to have been sustained on River Street and Wood Avenue.

Charles H. Price, of this Town, has brought an action against the Town, returnable in the Superior Court in March, 1893, in which he claims damages in the sum of \$1,000.

HIGH SCHOOL ADDITIONS, AND HIGHWAYS.

We came before you last March with carefully matured

plans for our year's work and asked for sufficient appropriations therefor, which you confidingly granted. hardly had we started in on the work which we had outlined when the attitude of the School Committee foreshadowed plans on their part which, if carried out, would lead to the abandonment of that financial policy to which, for the previous three years, the town had given its emphatic approval, and the preservation of which your selectmen felt they were expected to guard. That policy was to contract no more debt, until the present indebtedness was all cleared off, unless some emergency arose which made it absolutely necessary so to do. After looking over the situation carefully a majority of our Board were of the opinion that no such emergency had arisen; that it would be unwise for the town at that time to contract a considerable debt for the construction of a new high school building, and that the needs of the school could be met in a less costly way. Repeated meetings between our Board and the School Committee were held in vain attempts to unite on a policy sufficiently acceptable to both and which we could recommend jointly to the town. It was finally decided to go before the citizens with a majority and a minority report. The majority report was to the effect that nothing short of immediate construction of a new building could meet the demands which would be made by the expected increase of scholars, which was confidently estimated at fifty for the current year. The minority report advised the enlargement of the present school building so as to meet the probable requirements of the next few years, and recommended the transfer from the appropriation for highway improvements of enough money to meet the estimated cost of such enlargement, namely, \$6,000.

When you came to act on the reports, fellow citizens,

you adopted the latter; and we trust that you have no reason to feel dissatisfied with the decision you then made.

The High school building, as it now stands, is pronounced a credit to the town by those who have had experience in such matters and are capable of forming an intelligent judgment; and it is likely to meet all our wants for years to come. particularly if the increase in the number of its scholars is no greater than that of this year, which instead of the fifty counted on by the School Committee, has been only about seven: a number which could have been accommodated easily in the old building as it was.

This fact may serve, perhaps, as an object lesson to us all, showing us how imaginary wants may impose upon our intelligence, and so cloud it that reason for the time being ceases to have influence over our actions looking to our town's best interests.

As directed by the vote of the town the selectmen started in at once upon the enlargement of the building and contracted with Richardson & Rafter for the work above the foundation for the price of \$5,272. But as the work progressed defects were found that demanded attention. Among other things the furnaces in the building were utterly worthless, and there seemed to be no escape from adopting the same method of heating which the town had sanctioned in three other school buildings, namely, steam heating. Feeling that our action would be approved by the town we did not hesitate to have this done, at a cost of This, with other necessary expenses, such as piping, painting, mason work, digging the cellar, concreting, etc., brought the total cost of the improvements to \$8,919.31. For further particulars, we refer you to our detailed statement of expenses. If there be eliminated from this cost the outside concrete work, steam heating, and other sundries which could not be anticipated when the original calculation was made, it will be seen readily that our first estimate of \$6,000 as the cost of the proposed change was substantially correct; in fact, within fifty dollars of it.

The transferrence from the highway appropriation of the sum needed for the High school building necessitated an entire change in our plans for street work, and the adoption of the policy of doing such permanent work only as came easily within our remaining means, carefully considering our resources so that all the ordinary repairs upon our highways might be well attended to. We think that we have so done this that now, at the end of the year, not only are our streets fully up to their condition of a year ago but substantial improvements have been made, such as macadamizing some 2,65) feet of roadway in the neighborhood of the Cotton Mill and around the pond in Readville: 850 feet on Gordon Avenue; 300 feet more on West street, and rebuilding the 700 feet of Fairmount Avenue between Everett Square and the N. Y. & N. E. R. Crossing.

Of paved gutters we have constructed 400 feet on Arlington street and 350 feet on Williams Avenue; of curbing 268 feet on West River street, 195 feet on Hyde Park Avenue. We have put up a new fountain at Clarendon Hills station; have planked Fairmount and Stony Brook bridges; and have at the crusher 600 loads of stone ready for distribution upon the streets. We have paid every debt which has been contracted, and have balances amounting to \$35.52, also \$1,474.57 covered into the treasury from betterment assessments which at the last March meeting, the town neglected to make available for our use this year, as had been done before, but which may be considered fairly as belonging to the highway department; thus leav-

ing about \$1,500 in the town treasury to the credit of the highway appropriation ready for any call which the vicissitudes of the weather or any unexpected emergency may make. There are also \$1,290.50 of betterment assessments not yet collected.

With such a showing we feel that no mistake was made in sparing from the funds intended for permanent work upon the streets so much as was needed to make the changes in the High School building, which have fitted it to meet all probable demands till the time when, the burden of our indebtedness removed, all can join heartily in measures for the construction of an edifice for our High school pupils, which will be not only a joy to them but a credit and glory to our town.

Believing that the thoughts of the retiring Board as to the needs of the town for the ensuing year are appreciated by many of our citizens, as enabling them to come to more correct conclusions and aiding them to carry out those conclusions more intelligently at the appropriation meeting, we here present to you a table which shows in its first column the appropriations made this year, and in the next column what we think will be needed for similar purposes next year.

October 18, Fairview Avenu			
November 29, Furniture H	igh		
School Building.	1,000 00		
November 29, Board of Hea	alth, 744 33		\$2,744.33

\$112,675 00 \$104,719 33

We recommend that the amount required for Fire Hydrant service be appropriated from Corporation and National Bank tax, as in years past.

We present these figures to you after a careful consideration of the Town's situation and its needs, and if adopted, the tax levy will be under \$14 per \$1,000.

For schools we have put down the same as given last year except the \$2,000 which was appropriated for putting steam heating apparatus in the Fairmount school.

In addition to \$4,000 for ordinary repairs on our streets we recommend the appropriation of \$10,000 for permanent

improvements on highways From this amount ample funds will be available for the building of Metropolitan Avenue as decreed by the County Commissioners, and sufficient will remain for the performance of such other work as may be advisable.

The police department having \$1,110.39 now to its credit in the treasury, we advise an appropriation of \$500 less.

There remaining unexpended \$2,608.71 of the appropriations for the poor, we recommend \$1,000 less.

For street lighting we suggest \$200 less because of an unexpended balance in the treasury to that account.

The item of \$20,000 for debt and interest might be considerably reduced; but we believe that it is well to raise that amount this year, and a like amount next year, for by so doing our debt will be wiped out substantially, so that when we come to the March meeting of 1895 we will be relieved of this yearly burden of \$20,000 in our tax levy and our taxes per \$1,000 can easily drop to \$12 and under, thereby reaching in a period of two years that happy condition, the advocacy of which you have endorsed again and again for the last four years. And in looking forward to that period of low taxation we are not advocating a niggardly policy but a continuation of the methods which have shaped the conduct of the business of the town the last four years; a period when, we think, it can be said safely that as many substantial improvements have been made as during any time in the town's history.

Fellow citizens, having placed before you a report of our year's work we hope that you will give it that careful consideration which is always pleasant to a servant who labors to be faithful to the trust confided to him.

If we have failed to meet your every expectation, it has not been from any division of sentiment in our Board, nor from any intentional neglect of your desires, but from a failure on our part to correctly comprehend them.

Respectfully submitted,

ROBERT BLEAKIE,
STEPHEN B. BALKAM,
AMOS H. BRAINARD,
FREDERICK N. TIRRELL,
THOMAS S. WATERS,
Selectmen of Hyde Park.

The Town Clerk requests information of any omission or error in the above tables, in order that the registration may be as complete as possible.

Respectfully submitted,

HENRY B. TERRY,

Town Clerk.

REPORT OF THE BOARD OF HEALTH.

In giving the report for the past year, it would seem fitting that first we should make mention of those who have so faithfully served the town as members of this Board, whom our Heavenly Father in his goodness has seen fit to take from our midst, and whom we sincerely mourn.

In the latter part of spring Dr. J. P. Bills, chairman of the Board, after a few days sickness was called from us. Daniel F. Wood who was appointed to fill the vacancy which was caused by the death of Dr. Bills, acted as secretary for the Board for a few months, when after a few hours sickness death claimed a second member of the Board for this year.

The slectmen filled the vacancy caused by the death of D. F. Wood by the appointment of E. C. Farwell.

In offering this report we do not claim that our work has been perfect, but we have tried to work for the best interest of the town and its citizens.

The Board has held meetings at stated times, and special meetings when business of importance made it necessary.

We would call attention to the following circular issued by the State Board of Health:

PRACTICAL SUGGESTIONS RELATIVE TO CHOLERA.

A Circular from the State Board of Health of Massachusetts.

In view of the appearance of epidemic cholera during the present year in foreign ports and cities, and of the possibility of its occurrence in the cities and towns of Massachusetts, the following circular is issued by the State Board of Health for the guidance of local boards of health and all others whom it may concern.

While recognizing the extremely infectious nature of cholera the Board emphasizes the fact that the presence of imported cases ought not to prove a source of alarm to a community if the place receiving the infection has had, and, continues to have, thorough sanitary care and supervision.

The discharges from the bowels are without doubt the chief source of infection. Vomited matter is open to suspicion and should be similarly treated. In proportion as carelessness and neglect are permitted in the disposal of these discharges, the disease is liable to spread. Under ordinary circumstances, it is probable that a patient suffering with cholera has no power to infect others except by means of such excreta. Nor is it probable that he has any power of infecting at all, except in so far as particles from these discharges may infect the food, water or air which others consume.

A healthy person coming from an infected district may carry the infection of cholera upon the hands, or other parts of the body, or upon the clothing, and such person should be under the surveillance of the local board of health, and should not be allowed to mingle with the community, and especially should not engage in any occupation by which dust from the clothing, or infection from the person, may enter the food or drink of others, until the Board is satisfied that he and his clothes are no longer reasonably open to suspicion as vehicles of disease.

Strong soapsuds may be used for bathing the body. [For the treatment of clothing see instructions relative to Disinfection.]

A person arriving in a city or town, who is sick, his illness being known or suspected to be cholera, should not be allowed to dwell in a crowded community, but should be taken to a house having an open space around it, and immediately placed under the charge of a physician. He should be kept warm until the physician arrives. It there should be any doubt as to the character of the illness, the State Board of Health will, upon application, send an expert to decide the question.

The room occupied by the patient should have no carpet, and all articles not immediately needed, including extra clothing and tapestry, that may retain dust, should be removed. Dust upon the floor and turniture should be removed daily by wet cloths wrung out of strong, hot soapsuds, or solution of carbolic acid, and then burned. It would be well to have all the furnishings of the rooms devoted to the care of the sick of so cheap a character that they may finally be burned.

The utmost cleanliness should be practiced by the attendant both in regard to his own person and clothing and to the person of the patient, and to all articles in the sick room; and the attendant should not prepare food for himself, his patient or others, whereby it would be possible for infection to enter it from his person or his clothing. The hair of the attendant should be closely covered to exclude dust. The dishes and utensils used in the sick-room for food or medicine should not be taken to the kitchen, but should be washed with boiling water, and should be kept separately for this use and not be used by any other person. No food should ever be returned from the sick-room or from the attendant's room to the kitchen.

Special care should be taken in the disposal of the discharge of the sick. They should be treated with an equal volume of the milk of lime. They should not be carried through the house uncovered, and all vessels and their covers and the hands of the persons carrying them should be thoroughly washed with solution of carbolic acid. The discharges should be prevented from penetrating the mattress by a covering of rubber-cloth.

The clothing of the attendant and of the patient, and other fabrics used in the sick-room, should be frequently cleansed by boiling. If it becomes necessary to take such clothing to the kitchen or cookroom for the purpose of boiling, they should first be soaked in a saturated solution of carbolic acid for twelve hours.

The attendants should not go into other rooms than those intended for their exclusive use without bathing and change of clothes. Should it be necessary for other persons besides the attendants to enter the sick-room, they should take the same precautions not to earry infection from it upon their persons or their clothes.

The local board of health should provide a hospital where all cases which cannot pe properly isolated at home should be cared for. The hospital should be provided with a furnace or crematory, removed from other buildings, where the excreta from patients, and old clothing may be burned, and a room should also be provided where bedding and clothing from the hospital and from other places can be exposed to prolonged heat at a temperature of at least 212° F. (100° C.).

In addition to the other precautions which have been mentioned, the following considerations relative to the modes of propagation of cholera should be borne in mind:—

a. By leakage from privy-vaults and cesspools, and also by surtace drainage, the infective material of the cholera discharges may gain access to wells, or public water supplies and thus impart to great volumes of water the power of propagating the disease.

- b. The careless disposal of choleraic discharges, by suffering them to pass into public or private water closets, sewers, or cesspools without disinfection, infects the sewage therein contained, and possibly the effluvia evolved by such sewage. The effluvia from privies or even from improperly cleansed vessels which had once contained such discharges may likewise be infectious.
- c The infective power of cholera discharges attaches to bedding, clothing, towels, and other articles which have been soiled with them, and renders them as likely to spread the disease in distant places to which they are sent as in like circumstances the patient himself would be. The infective material of cholera is not discernible by the unaided sense of sight or by smell, and may become attached to clothing, linen, bedding or other articles without being detected by ordinary means. Hence all such articles should be thoroughly disinfected by prolonged boiling or by soaking in the saturated solution of carbolic acid for twelve hours before being removed from the rooms devoted to the care of the sick.

It is also recommended that immediate and thorough examination of the public water supplies should be made by local boards of health, especially when such supplies are liable to the least suspicion of contamination. If pollution is discovered, immediate measures should be taken for preventing its continuance.

The surrounding of private wells should also be examined with reference to possible sources of infection. Careful attention should be given to the removal of house refuse, offal and garbage, and accumulations of filth in neglected places.

Local boards of health are urged to make thorough inspection of the water supply and drainage of all public institutions, schoolhouses, railroad depots, pienic and camp grounds, travelling shows and all places where people are accustomed to assemble.

The following existing statutes relative to dangerous infectious diseases should be carefully complied with: -

CHAPTER 102, ACTS OF 1890.

When a householder knows that a person within his family or house is slek of small-pox, scarlet fever or any other infectious or contagious disease dangerous to the public health, he shall immediately give notice thereof to the board of health of the city or town in which he dwells, and upon the death, recovery or removal of such person, such of the rooms of said house and such of the articles therein as, in the opinion of the board of health, have been subjected to infection or contagiou shall be

disinfected by such householder to the satisfaction of said board of health. Any person neglecting or refusing to comply with either of the above provisions shall be punished by a fine not exceeding one hundred dollars.

CHAPTER 98, ACTS OF 1884.

SECT, 2. When a physician knows that a person whom he is called to visit, is infected with small-pox, diphtheria, scarlet fever or any other disease dangerous to the public health, he shall immediately give notice thereof to the selectmen or board of health of the town; and if he refuses or neglects to give such notice, he shall forfeit for each offence not less than fifty nor more than two hundred dollars.

SECT. 3. The boards of health in the several cities and towns shall cause a record to be kept of all reports received in pursuance of the preceding sections, and such record shall contain the names of all persons who are sick, the localities in which they live, the diseases with which they are affected, together with the date and the names of the persons reporting any such cases. The boards of health shall give the school committee immediate information of all cases of contagious diseases reported to them according to the provisions of this act.

SECT. 4. The secretary of the Commonwealth shall furnish the boards of health with blank books for the record of cases of contagions diseases as shove provided.

INDIVIDUAL PRECAUTIONS.

The following precautions are recommended to private individuals, and especially to householders:—

- 1. Domestic Water Supply. The supply of water for household purposes should be pure, and especially free from contamination by house drainage. Wells located in close proximity to privies and esspools are always open to suspicion of contamination. If there is any question as to the quality of the drinking water it should be boiled a half-hour before using.
- 2. Good, wholesome food should be eaten, such as people have found it best for them to eat at other times.

Fruit should be ripe and sound, and vegetables should be fresh and properly cooked. Excesses in eating and drinking and indigestible food should be avoided.

Care should be taken to secure a milk supply which is above suspicion. In case of an epidemic, all milk should be boiled.

3. Every householder should carefully attend to the condition of the water-closets, privies, cesspools, drains, cellars, stables, yards, outbuildings and sheds upon his premises, and cause them to be kept in a cleanly condition.

DISINFECTION.

The following disinfectants are recommended:-

1. Milk of lime. Milk of lime may be prepared by sprinkling

one quart of water gradually upon a quart of quick-lime in broken pieces in a metallic or wooden vessel. When the lime is reduced to powder, three quarts of water should be added, and the whole kept in a covered vessel.

2. Chloride of lime. (One part of lime to 50 parts of water.) The chloride of lime should be fresh, and may be used either in powder or in solution.

3. Solution of potash soap, (Three parts of soap to 100 of hot

water, or 1 pound to 4 gallons of water.)

- 4. A saturated solution of carbolic acid. If the crude acid is used it should be dissolved in the warm soap solution, 1 part of carbolic acid to 20 of the soap solution. Pure acid may be dissolved in water without the soap (1 part to 20.)
- 5. A temperature of at least 212° F. (100° C.) for an hour, either by boiling, baking or steam heat.

MODE OF EMPLOYMENT.

For the disinfection of excreta. The excreta of cholera patients should be received into metallic or earthern vessels and mixed at once with equal parts of milk of lime. Chloride of lime may also be used in the proportion of two heaping tablespoonfuls to each pint of liquid excreta.

For disinfection of the hands, etc. The hands and other parts of the body which may have become exposed to intection from excreta, soiled clothing or bed linen, should be washed in a solution of chloride of lime (1 part of lime to 50 parts of cold water) or a saturated solution of carbolic acid.

Bed linen, shirts and such articles as can be washed should be washed in strong soapsuds, and subjected to a boiling heat for half an hour, or they may be placed in the carbolic acid solution for twelve hours.

Clothing which cannot be washed should be subjected to heat above 212° F. Articles of leather and rubber may be treated with the carbolic acid solution.

The exposed wooden or metallic surfaces of furniture should be washed with cloths wet with solution of carbolic acid. The floors of sick-rooms should be treated in the same manner. The cloths thus used should be burned.

The sick-room should not be used by others until the walls and floor have been scrubbed with cloths wet with solution of carbolic acid and the ceiling whitewashed. The doors and windows should be

kept open for at least twenty-four hours afterward to allow a free admission of out door air.

Concrete, asphalt, brick and oher pavements and gutters exposed to cholera infection should be flooded with milk of lime.

Upholstery feather-beds and mattresses should be subjected to steam heat in a disinfecting apparatus. Where this is impracticable they should be destroyed by burning.

Straw and excelsior bedding, rags, old clothes and other articles of little value should be destroyed by fire.

The use of proprietary disinfectants and patent remedies for cholera should be avoided.

SUGGESTIONS TO PHYSICIANS.

The Board recognizes that success in the preventive treatment of cholera depends very largely for its efficiency on the willing aid of the attending physician. His position and his special training enable him to make a proper use of the means for the management and control of the disease, and his daily intercourse with the people makes it possible for him to be very useful in promoting the measures adopted for insuring the public health and in allaying needless panic.

The special points to which the attention of the practising physician is directed are: -

- 1. Immediate notice of each case to the local board of health of the city or town in which the case occurs.
- 2. In doubtful cases the same precautions as to isolation and disinfection should be employed as in an undoubted case of cholera.
- 3. Disinfection of the discharges should be practiced as recommended in the foregoing instructions.
- 4. The patient should be isolated, and where this is impracticable, he should be taken to a hospital provided for the purpose.
- 5. The nurses and attendants should be carefully instructed as to the disinfection of their hands, their clothing and the care of the food.
- 6. Excreta of the sick and other infected material should not be disposed of upon the cultivated soil nor in the neighborhood of wells, springs or water supplies, but should be thoroughly disinfected or destroyed by fire.
- 7. In case of death of the patient the burial should take place as soon as possible and in all cases should be private.
- 8. Since exactness in diagnosis is essential, experts will be sent by the State Board of Health to determine the character of any case of which the Board receives notice at its office, No. 13 Beacon street, Boston.

If these directions are carried out we feel that the town will be protected not only from this but other contagious diseases.

Mr. C. H. Crumett and Mr. Frank Hukin were again employed to collect swill, and at the death of Mr. Hukin, his wife with the assistance of Mr. Caleb Hall was allowed to continue his business. Complaints have come to the Board that unauthorised parties were collecting swill, and efforts have been made to stop them. We respectfully thank those who during the past year have notified us when the laws were thus broken.

CONTAGIOUS DISEASES.

Cases of typhoid fever, diphtheria, scarlet fever, and measles, when reported by physicians have been attended to according to law.

The number of cases that have been reported are as follows:

Diphtheria,	9	with	3 d	eaths.
Scarlet fever,	25	6.6	0	6.6
Typhoid Fever,	23	6.6	4	6.6
Measles,	11	+6	0	6.6
Membraneous Croup,	2	6.6	0	6.6

Making total of 70 cases and 7 deaths, about the same as last year.

LOW WET LANDS.

Complaint came to the Board that the vacant lot on Pierce street beyond the Baptist church was used for dumping rubbish from which bad odors arose and thus creating a nuisance. The owner expressed a willingness to do what was necessary, and the place was put in proper condition.

Complaint was made to the Board in July in regard to a lot of land lying between Arlington and Page streets and Central avenue, said land being low; water collected there and became stagnant, making the place unhealthy for those living in the vicinity; also land lying between Central and Metropolitan avenue and Arlington street in the same condition.

After investigating the same the Board ordered the owners to fill it in to such height as would turn the water coming into or on said land into a culvert which should properly drain it. These orders were complied with and the work was done without expense to the town.

When complaints have come in the proper form we have given them prompt and careful attention.

REGULATIONS OF THE BOARD OF HEALTH

[SEAL.]

OF THE TOWN OF HYDE PARK.

Public Statutes, Chapter 80, Section 18 — The Board of Health of a town shall make such regulations as it judges necessary for the public health and safety, respecting nuisances, sources of filth, and causes of sickness within its town. Whoever violates any such regulations shall forfeit a sum not exceeding one hundred dollars.

In accordance with the foregoing provisions of law, this Board makes the following regulations, which will be strictly enforced.

REGULATION 1.— The owner, agent, or occupant having the care of any tenement used as a dwelling house, shall furnish the same with sufficient drain, under ground, to carry off the waste waters; also with a suitable privy or water closet sufficient for the accommodation of all those inhabiting the premises—All waste pipes from water closets, sinks bowls, bath and other set tubs, shall be suitably trapped, and all drains entering cesspools must be made water tight. There should also be a trap in the soil pipe between the house and cess pool, and provision made to admit air into said pipe between the house and trap.

REGULATION 2. — All privy vaults, unless water tight, shall be so constructed that the inside of the same shall be at least five feet distant from the line of every adjoining lot or street, and from any

dwelling house and shall be provided with a ventilation through the roof; the same shall not be used as cesspools nor receive drainage from the premises; their contents shall not be allowed to leak out or otherwise become offensive.

REGULATION 3.—All waste water shall be so conveyed through sufficient drains, under ground, to a reservoir sunk under ground as shall be approved by the Board of Health. No person shall allow any drain or the overflow of any cesspool to enter any running stream, or any drain constructed for surface water, and no person shall suffer any house drainage or other offensive water to remain in any cellar, or upon any lot or vacant ground by such person owned or occupied. All privy vaults and cesspools within thirty feet of any well or spring, the water of which is used for domestic purposes, must be water tight.

REGULATION 4. — The Board, when satisfied upon due examination that a cellar, room, tenement or building in the town occupied as a dwelling place, has become by reason of the number of occupants, want of cleanliness or other cause, unfit for such purpose, and a cause of nuisance or sickness to the occupants or the public, may issue a notice in writing to such occupants, requiring the premises to be put in proper condition; or if the Board see fit they may require the premises to be vacated, and the same shall not be again occupied without the written permission of the Board.

REGULATION 5.— No person shall throw or put into any public place or pond, or running stream or body of water, or in any other place where the Board of Health may deem it a nuisance, any dead animal, animal matter, decayed fruit or vegetables, dirt or rubbish whatever; nor shall any person throw into or upon any flats within the jurisdiction of the town, any dead animals, filth or offensive matter.

REGULATION 6. — No person shall remove or carry in or through any of the streets, lanes or avenues, places or alleys within the town of Hyde Park, the contents of any cesspool, vault or privy well, swill or house offal, (either animal or vegetable,) or grease or bones, unless a permit be granted by the Board of Health upon such terms and conditions as said Board may deem necessary.

REGULATION 7. — No person shall bury swill or house offal, or the contents of any cesspool, vaults, privy, or privy well within the limits of the town of Hyde Park unless a permit be granted by the Board of Health.

REGULATION 8. — Parties will be licensed by the Board of Health to collect swill and refuse matter from houses in Hyde Park twice a week or oftener, and all housekeepers and others are directed to deliver the same to those duly authorized to make such collections.

REGULATION 9. — No person shall bring into the town, keep or offer for sale any diseased, putrid, stale or unwholesome meat, vegetables or provisions.

REGULATION 10.— No person will be permitted to keep any swine within the limits of the town of Hyde Park without a written permit from the Board of Health.

Regulation 11.— Any person sick with the small pox or other contagious disease, together with all persons in attendance upon them, and the premises where such sick person is, will be subject to the control of the Board, and no person shall enter or leave a house wherein a person is or has been sick with the disease, or in any way come in contact with the inmates of such house, except by permission of the Board.

REGULATION 12. — Whenever the Board of Health shall ascertain that any person is sick with small pox, scarlet fever, diphtheria, or any other disease dangerous to the public health, the Board shall at their discretion have full control of said person or premises, and shall, if they deem proper, order the premises vacated.

REGULATION 13. — All persons are warned not to approach a house of the surrounding premises whereupon is displayed a disease flag by day, or a red light by night.

REGULATION 14. — The bodies of all persons dying of small pox, scarlet fever, typhus fever or diphtheria must be immediately disinfected and placed in a tight coffin, which shall not be reopened, and the bed, bed clothing, and other elothing used by any such person, and by those in attendance on him, and all the furnishings of the sick room, thoroughly disinfected before being taken from said room. In the above case no public funeral will be allowed without permission from the Board of Health.

REGULATION 15.— The owner, or persons having charge of any vehicle, public or private, used at a funeral in the foregoing cases, to carry the deceased, or any of the family or attendants of the deceased, shall forthwith report the fact to the Board of Health, and shall thoroughly disinfect such vehicle before the same is again used, and take such other precaution as the Board of Health shall direct.

REGULATION 16. - Any person in the town of Hyde Park, who

knows or suspects any domestic animal has contagious disease (such as glanders in horses or cholera in swine) must immediately report the same to the Board of Health. The penalty for neglect to do so is fine or imprisonment. The above is in accordance with the provisions of Chapter 252 of the Acts of 1887.

REGULATION 17. — All complaints in relation to nuisances and sources of filth injurious to the public health and safety, must be made in writing to the Board of Health, with a description of said nuisance and of the premises on which it exists, with the owner's name, if known to the complainant. Such complaints must bear the signature of the complainant. Whenever such complaint shall be made as aforesaid, the Board of Health will proceed to examine the premises complained of, and will take measures to abate the nuisance, if such is found to exist.

Fully believing that a large proportion of contagious diseases originate from unsanitary conditions, we trust we shall have the aid of all citizens and property owners in carrying out the above regulations, which are based on statute laws, and the sanitary rules of our large towns.

For burial permits apply to A. G. Childs, druggist, 30 Fairmount Avenue.

APPROPRIATIONS.

Owing to unpaid bills which have run over from year to year the Board was obliged to call for an extra appropriation which was granted and placed us in a better condition financially than for many years.

FINANCIAL.

The amounts appropriated and expended have been as follows:

Appropriatio	n, March 30, 1892,	\$1,500 00	
6.6	November, 29, 1892,	244 33	
44	4. 46 46	500 00	
	Total	\$2,244	33

Bills	paid	on	account	of	1891.
-------	------	----	---------	----	-------

Paid A. G. Childs,	\$ 46 00
E. Davis,	35 00
D. F. Wood,	2 32
P. Rooney,	24 58
F. Hukin,	240 00
S. R. Moseley,	.36 00
C. H. Crumett,	432 00
Total	
Bills paid for 1892.	
Paid C. H. Crumett,	\$607 25
Mrs. F. Hukin,	534 75
F. E. Langley,	19 50
S. R. Moseley,	31 25
J. C. Tingley,	· 2 00
William Batho	50
R. Williams,	199 75
J. Crowley,	5 00
J. Snellgrove,	3 00
A. G. Childs,	19 43
D. F. Wood,	6 00
	\$1,428 43
Total appropriation,	\$2.244 33
" expended,	2,244 33

We would call attention to the fact that over eight hundred dollars of this year's appropriation was used to pay last year's bills, and would be speak for the new Board one large enough to meet all expenses.

Respectfully submitted,

J. C. LINCOLN, M. D., A. D. HOLMES, M. D., E. C. FARWELL,

Board of Health.

REPORT OF THE OVERSEERS OF POOR.

TO THE CITIZENS OF HYDE PARK:

The overseers of the poor in submitting their report for the year, beg leave to call attention to the decreased amount of expenditures and also the falling off in the total number of persons aided. Compared with the report of last year it will be noted that the amount disbursed during the year just closed is \$700, less and the number of tramps who have sought temporary lodgings is less by 420, as the present winter has been, thus far, one of unusual severity, the facts above stated are noteworthy, denoting as they do general prosperity and employment among those who occupy the humbler walks in life.

As January 31st, 1893 marks the close of the twenty-fifth financial year of our town we are of the opinion that a brief statement of the cost of conducting this department during the quarter century past will be of interest to many of our fellow citizens. Total amount of appproriations from 1868 to 1892 inclusive \$72,971.22, total expenditures \$77,702.70. Average appropriation per year \$2,918.85, average expenditure, \$3,108.10. The smallest amount expended was \$344.54 in 1868; the largest, \$5,540.05 in 1877. Appropriations have varied from \$600 in 1871 to \$5,500 in 1877. No appropriation was called for in 1874, as there remained a large unexpended balance from the year previous. In two instances only have the expenditures exceeded \$5,000.

Number	of	persons	aided,	2,603
44	44	46	fully supported,	8
64	46	66	partially supported,	85
44	66	tramps	lodged,	2,510

CHARLES LEWIS, JOHN TERRY, GEORGE W. CHAPMAN,

Overseers of Poor.

POLICE REPORT.

TO THE HONORABLE BOARD OF SELECTMEN:

Gentlemen: I have the honor to submit my Annual Report of the Police Department for the year ending January 31st, 1893.

Number of persons arrested,	164
CAUSES FOR ARREST.	
Drunkenness (simple),	45
Drunker.ness (common),	5
Assault,	15
Disturbance of the peace,	48
Liquor nuisance,	9
Vagrants,	17
Malicious mischief, (breaking glass),	1
Cruelty to animals,	1
Insane,	6
Breaking, entering and larceny,	6
Perjury,	1
Truancy,	1
Evading car fare,	1
Lewdness,	1
Exposure of person,	3
Common brawler,	1
Illegal voting,	1
Distraining cattle (unlawfully),	2
	101
	164

MISCELLANEOUS WORK.

Stolen property recovered,	\$1,375 00
Stores found open at night,	21
Cases investigated without arrest,	129
Search warrants for intoxicating liquor,	9
Travellers lodged in station house over night,	2,510
4.403	

(43)

There has been no material change in the Police Department during the last year. Mr. James A. Cullen, our faithful and efficient night officer, resigned last December, on account of poor health. Mr. John M. Brown occupies his place. In former years I have made some suggestions and recommendations in relation to the needs of this Town, and at this time I see no reason to add to what has been already said. I am still of the opinion that there should be some addition to the force, as it now stands; but rather than name them here, should prefer to meet the Selectmen and confer with them in relation thereto.

CHARLES E. JENNEY, Chief of Police and Keeper of Lockup.

ENGINEERS' REPORT.

TO THE HONORABLE BOARD OF SELECTMEN:

We herewith present to you our annual report for year ending Jan. 31st, 1893, together with record of fires and losses; also, an inventory of Department property.

At the commencement of the year we concluded to sell one Steamer and Hose Reel, and purchase a Hose Wagon, which was much needed, as the Reel in use by Hose Co. No. 1 was deemed unsafe for further use.

Last April we found a customer for same at \$600.00, and we contracted with the Abbott-Downing Company, of Concord, N. H., for Hose Wagon, at a cost of \$460.00, and the balance of money was used to purchase 500 feet new Hose, of which the Department was in much need. You will see by report of Steward annexed to this that we should add more new Hose at once, as a large percentage of Hose in use is not servicable, owing to its age and the present high water pressure.

We have lately added a six circuit repeater to Fire Alarm, and have put the whole system into five circuits, thereby enabling us to locate any trouble that may occur on line more readily, and also have a good portion of line in use.

We recommended in our last year's report the addition of more Hydrants, and as the Town took no action on same, we would urge it again this year, and trust that a contract with the Water Company will be made for more Hydrants to cover unprotected parts of our Town. The following is a list of Officers and Men in Fire Department:

STEWARD'S REPORT.

THE FIRE ALARM.

The Fire Alarm is in good condition, and consists at present of a six circuit automatic repeater with cutting out switches and galvanometers of which five circuits are in use and controlling about fifteen miles of wire, connected with which are one Steam Whistle and mechanism for blowing the same; one Tower Bell Striker and eight gongs ranging in size from six to sixteen inches; also, a circuit closer operating an open circuit of two miles of wire; and five 4-inch gongs for the exclusive use of Hose 3, Readville; there are eighteen street boxes on the line, and the whole is operated by a 90-cell battery divided to suit circuits.

There has been two or three miles of the line relaid; also, some new wire strung and improvements made, so that the entire system is in a good and substantial condition. There should be a Striker put upon the bell at the Engine House, and also more boxes added, either of which is very important and necessary.

Arrangements have been made by which the alarm will be used to notify the teachers and scholars of no sessions of the Public Schools.

HOSE

There is in the Department about 5,500 feet of Hose; 2,500 is good, 2,000 fair, 1,000 has been repaired once or twice, and is poor.

The Department is equipped as follows:
With 1 fourth-class Steam Fire Engine, in good con(48)

dition; 1 Double Tank Chemical Engine; 1 Two-Horse Hose Wagon, capacity 1,500 feet cotton hose; 1 One-Horse Hose Wagon, capacity 1,000 feet hose; 1 Two-Horse Hose Reel, capacity 1,200 feet hose; 1 Two-Horse Ladder Truck, carrying 30 J feet Ladder, also a full complement of tools, consisting of lanterns, hooks, rakes, axes, guyropes, pull down hooks, etc.; the Hose Wagons and Reels are all equipped with the necessary lanterns, hats, play pipes, axes, crowbars, spanners, wrenches, etc.; there are also 5 sets Double Harness "Swinging"; 1 Single Harness; 4 pairs Blankets; also Bit Halters, Whips, etc.

The furnishing of the houses consists of ordinary hard-wood chairs of which there are one dozen, part of a hard-wood chamber sett, six settees, three tables and a sideboard.

The furnace used in heating the Central Station is rapidly wearing out and is not large enough to thoroughly heat the building.

There is a Bell upon the Central Station which is not in use on account of the need of a striker, and as the ringing of it makes it difficult to count the alarm it has been discontinued.

The apparatus is all in good order and is ready at all times for immediate use.

E. A. HAWLEY, Steward and Sup't Fire Alarm.

REPORT OF THE TRUSTEES OF THE PUBLIC LIBRARY.

During the past year, a branch delivery station has been established at Readville, and books sent there once a week for distribution, with gratifying results. As that part of our Town seems likely to rapidly increase in population, doubtless the demand for books at this branch will increase greatly in the next few years.

The extra space secured by changes in the interior arrangements of the library, referred to in the report of last year, is rapidly becoming exhausted, and we must once more call attention of our citizens to the need of larger and more attractive rooms.

A third supplementary catalogue, including books added from January, 1890, to January, 1892, has been issued. 459 volumes and 42 pamphlets have been added to the library; all of the pamphlets and 35 of the volumes by donation. The total number of volumes is now about 12,500, and in addition to these, the current magazines are provided for use at home and in the reading room.

The total home circulation for the year ending January 1, 1893, has been 33,063, an increase of over five per cent. over the preceding. 1,423 magazines and 1534 volumes have been issued for use in the reading room, a very gratifying increase over the previous year of more than forty per cent.

The case of reference books in the reading room, which may be consulted without application to the librarians, has been very freely used.

The Library Fund is now \$6,326.76, and reference is made to the Treasurer's Report for a detailed statement of the same. The property in charge of the Trustees is the same as last year, except the additional books and cases.

The following is a list of the donations received:

---	--	----------------	---

REPORT OF THE CEMETERY COMMISSIONERS.

The Cemetery Commissioners submit their First Annual Report for the Financial Year 1892-93.

FAIRVIEW CEMETERY.

Your Commissioners received from the sale of lots \$1,650.00; for wood \$3.00; for interments \$53.00. They have expended \$1,582.40.

For a detailed statement of Receipts and Expenditures, see Financial statement accompanying this report.

The Commissioners have built 1,200 feet of streets and avenues, in a most thorough manner; they have laid out 42 lots and have placed stone posts with round finished tops at each corner. The lots have been grubbed and graded. They also have twenty-five lots nearly ready for use.

The Commissioners have paid to the Town Treasurer \$1,706 from the sale of lots and wood. They received from the Cemetery Committee \$1,706.02, which was the unexpended balance from the \$10,000 appropriated by the Town, to be used in the buying and laying out of the Cemetery.

Your Commissioners, on their appointment, commenced work immediately, and have done all that was possible for them to do in the short time prior to the extreme cold weather, and with the money at their disposal. They believe that they should commence the work of building avenues and paths, laying out lots and grading, as soon as the frost is out of the ground, expecting that the demand for lots will warrant them in pushing the work.

The Commissioners wish to call the attention of the voters to the fact that they were instructed by vote of the Town, to build a suitable receiving tomb, and it is their opinion that it should be erected the coming Spring.

There are a few lots of land that separate lands now included in the Cemetery, which should be purchased in order to make the whole available, providing same can be had at a reasonable price.

The Commissioners want it understood that every dollar received by them from the sale of lots, has to be turned over to the Town Treasurer. They recommend that the Town appropriate such a sum of money as will enable them to build a tomb, continue the work of laying out avenues and paths, and to use for other necessary expenses.

STATISTICS.

GEORGE M. RICE, GEORGE E. WHITING, CHARLES F. JENNEY,

Cemetery Commissioners.

Hyde Park, Feb. 1, 1893.

BY-LAWS.

NOTIFICATION OF TOWN MEETING.

Every town meeting shall be notified by posting copies of the warrant calling the same, in ten public places in the town, seven days, at least, before the day appointed for said meeting.

ANNUAL TOWN MEETINGS.

The annual town meeting for the election of town officers shall be held on the first Monday of March of each year. The meeting shall be opened at seven o'clock A. M., and the polls shall be kept open until sunset.

A town meeting shall also be held annually between the first Monday of March and the first Monday of April, for appropriating such sums of money as may be necessary for town purposes, and for transacting such other business as may legally be brought before said meeting.

RULES FOR THE GOVERNMENT OF TOWN MEETINGS.

- 1.—All questions submitted for the consideration of the town, involving the expenditure of money, shall be in writing, when so required by any legal voter.
- 2.—No vote fixing the period for closing a ballot shall be reconsidered after such ballot shall have commenced; but it may be in order to extend the period without such reconsideration.
- 3.—When a question is under debate motions shall be received to adjourn, to lay on the table, the previous question, to postpone to a certain time, to postpone indefinitely, to commit, or to amend; which several motions shall have precedence in the order in which they are herein arranged.
- 4.—The powers and duties of the presiding officer, not especially provided for by law, or by the foregoing rules, shall be determined by the rules of practice contained in "Cushing's Manual," so far as they are adapted to the condition and powers of the town.
- 5.—No vote shall be reconsidered except upon a motion made within one hour after such vote has passed, unless such reconsideration is ordered by a vote of two-thirds of the voters present and voting

FINANCIAL YEAR.

The financial year of the town shall begin with the first day of February in each year, and end on the thirty-first day of the following January.

The selectmen, overseers of the poor, board of health, surveyors of highways, and school committee shall post in some conspicuous place at their official rooms, a notice of the times of their respective meetings.

COLLECTION OF TAXES.

- 1. -The assessment of taxes shall be completed, and a list of the same delivered to the collector, on or before the first day of August of each year.
- 2.—All taxes which may be assessed, if paid on or before the first day of October next after the assessment, shall be entitled to such discount as the town shall vote at its annual meeting. All taxes shall be due and payable on or before the first day of November next following the assessment of said taxes.
- 3.—On the first secular day of each month, the collector shall pay over to the town treasurer all the taxes collected by him, and he shall, on or before the first day of February in each year, make up his account and render the same to the auditors.

DUTIES OF THE AUDITORS.

- 1.—The auditors shall examine the accounts of the selectmen, school committee, treasurer, collector, trustees of the public library, and all other officers or committees entrusted with the expenditure of money, quarterly, and shall certify as to the correctness of the same in the printed annual report.
- 2.—Before certifying to the accounts of the treasurer, they shall examine his cash book, wherein shall be entered his receipts and payments, as they occur from day to day, shall see that he has paid out no moneys except on proper vouchers, carefully examine all payments for interest, and see that the funds on hand are intact.
- 3 —Before certifying to the collector's accounts, they shall examine his cash-book, showing the amounts collected from day to day, and showing when the same were paid over to the treasurer; shall see that he has collected interest on all taxes overdue, and shall see a complete list of abatements, and also a list of unpaid taxes.
- 4.—They shall see that the accounts of the trustees of the public library are kept in a correct manner, and that all payments are accompanied with proper vouchers.

COASTING.

Coasting on any of the public streets of the town is prohibited, except upon such streets as the selectmen may designate each year by public notice.

HIGHWAY AND POLICE REGULATIONS.

- 1.—No building shall be removed over a public street without the written permission of the selectmen.
- 2.—The owner of such building, or the person or persons removing the same, shall give a bond in such penal sum, and with such sure ties as the selectmen shall determine, with condition to reimburse the town for all sums of money which it may be liable or compelled to pay in consequence of such use of the highways.
- 3.—No person except the selectmen or the surveyors of highways, in the lawful performance of their duties, or those acting under their orders, shall break or dig up the ground in any street or public way in the town, without first obtaining a written permit from the selectmen; and all persons acting under such permit shall put up and maintain a suitable railing or fence around the part of the street so broken up, so long as the same shall remain unsafe or inconvenient for travellers, and he or they shall keep one or more lighted lanterns fixed to such railing or fence, or in some other way exposed every night from twilight in the evening through the whole night, so long as such street or way shall be or remain unsafe or inconvenient for travellers.
- 4.—No person shall ride or drive a horse in any street in the town at a rate faster than eight miles an hour.
- 5.—No person shall, without the written consent of the selectmen, play at any game in which a ball of any kind is used, or fly a kite, or throw or shoot stones, arrows, balls, snow balls, or other missiles, or discharge any gun, cannon, or firearm, or make any bonfire or other fires in any street or way where the public have a right to pass.
- 6.—No person shall propel, drive, wheel or draw any bicycle, tricycle, cart or vehicle of any kind whatsoever except a child's carriage drawn by hand, nor use roller skates upon or over any sidewalk in this town, nor permit nor suffer any horse, cattle, swine or sheep, belonging to him or under his care or keeping, to go upon or over the same, nor suffer any horse to remain hitched across, or upon, or otherwise obstruct or injure, any such sidewalk.

- 7.—No person shall hitch or fasten any horse to any ornamen al tree standing or growing on or near any sidewalk, or to the boxing or guard about said tree, without the consent of the owner thereo.
- 8.—No person shall without a written license from the selectmen place or cause to be placed, or suffer to remain within the limits of a street or upon any sidewalk, so as in any manner to obstruct the travel thereon, any vehicle, wood, coal, manure, dirt, gravel, stones, building material, barrels, boxes, merchandise, or any rubbish or obstruction whatever.
- 9.—No person shall carry in a public street, house-offal, either animal or vegetable, or grease, or bones, or the contents of cesspools or vaults, unless he has been expressly licensed therefor by the Board of Health, upon such terms and conditions as said board may deem that the health and interests of the town require.
- 10.—Loud crying of wares or merchandise, or hallooing, hooting or making loud and unseemly noises on the public streets or squares of the town, to the annoyance of the citizens, is prohibited.
- 11.—No person shall behave in a rude, indecent or disorderly manner, or use profane, indecent, or insulting language, in any public place, or on any sidewalk or street in the town, to the annoyance or disturbance of any other person there being or passing in a peaceable manner, or be or remain upon any sidewalk, street, or crossing, or about doorways or places of business, to the annoyance or disturbance of any person.
- 12.—Three or more persons shall not continue to stand or remain in a group or near to each other, on any sidewalk or street or crossing, or in any public place, in such a manner as to obstruct a free passage for foot passengers, after having been requested by a constable or police officer to move on.
- ·13.—No person shall be or remain in any doorway, or upon any stairs, doorstep, portice or other projection from any house or building, or upon any wall or fence on or near any street or public place, after having been requested by the owner or any occupant of the premises or by any constable or police officer to remove therefrom.
- 14.—No person shall make any indecent figures, or write, print, paint, or cut any obseene word or words upon, or deface, break or injure in any manner, any fence, post, sign, street lantern, building or structure; or commit a nuisance upon any sidewalk or other place resorted to by the public, or against any tree, building or structure adjoining a sidewalk.

- 15.—No person shall extinguish any street light, or extinguish or remove any light placed to denote an obstruction or a defect in any street or way, without proper authority.
- 16.—No person shall swim or bathe in any of the waters within the limits of this town, so as to be exposed in a nude state, to the view of any person passing or being upon any railroad or street or in any dwelling-house in this town.
- 17.—No person shall intermeddie with any hydrant, gate, gate-box or water pipe placed or located within the limits of any public way in this town, without permission from the selectmen or the Hyde Park Water Company.

PASTURING OF CATTLE OR OTHER ANIMALS ON STREETS OR WAYS.

No person shall pasture any eattle, goat or other animal upon any street or public way in said town, either with or without a keeper, except within the limits of such way adjoining his own premises, and field drivers are instructed to enforce this by-law.

TRUANTS.

- 1.—This town hereby avails itself of the several provisions of the statutes of this commonwealth, now in force, relating to habitual truants and absentees from school.
- 2.—All children convicted of habitual truancy hereunder, and children between the ages of seven and fifteen years, residing in said town, and who may be found wandering about the streets or public places of said town, having no lawful occupation or business, not attending school, and growing up in ignorance, may be committed to the Lawrence Industrial School, at Lawrence, Mass., or to any house of reformation which has been or may hereafter be established by the County Commissioners of the Jounty of Norfolk, or to any place provided by this town within its limits, for confinement, instruction and discipline.
- 3.—Two or more truant officers shall be appointed annually, whose duty it shall be to inquire into all the violations of the truant laws, and of the law relating to compulsory education, and to do all the acts required of them by the laws of the Commonwealth.
- 4.—It shall be the duty of every truant officer, previous to making any complaint under these laws, to notify the truant, or absentee from school, also his parent or guardian, of the offence committed, and of the penalty therefor, and if the truant officer can obtain satis-

factory pledges for the restraint and reformation of the child, he may, at his discretion, forbear to prosecute so long as such pledges are faithfully kept.

5.—It shall be the duty of the School Committee, the teachers of the public schools, and the citizens generally, to aid the truant

officers as far as possible in the discharge of their duties.

6.—It shall be the duty of the truant officers to keep a full record of all their official acts, and make an annual report thereof to the School Committee, who shall publish the same with their own report.

7.—Nothing in these by-laws shall be so construed as to alter or impair the obligation and duty of teachers to enforce punctuality and regularity of attendance, and to preserve good order and discipline.

LIST OF TAX-PAYERS.

The names of all persons paying a tax on real or personal property shall be published annually in the town reports, together with the amount of tax assessed upon each, and whether the same is paid or unpaid.

DUTIES OF TOWN CLERK.

The Town Clerk shall keep a file of all town reports, reports of all committees chosen by the town, and all original documents relating to the affairs of the town which may come into his possession; he shall, as soon as practicable after any election has been held by the town, in addition to the notices he is now directed to give to officers who are required to take an oath of office, also issue a written or printed notice to all persons who have been elected to any other office, or chosen to serve on any other committee, stating the office to which such person has been elected, or the duties which such committee was chosen to perform.

CONTRACTS MADE IN BEHALF OF THE TOWN.

Every contract exceeding one thousand dollars shall be accompanied by a suitable bond for the performance of the same, or by the deposit of money or security to the amount of such bond.

ACTIONS AT LAW.

The selectmen shall have full authority, as agents of the town, to employ counsel to institute and prosecute suits in the name of the town, and appear for and defend suits brought against it, unless otherwise specially ordered by a vote of the town.

CONVEYANCING.

Whenever it shall be necessary to execute any deed conveying land, or any other instrument required to carry into effect any vote of the town, the same shall be executed by the selectmen, or a majority of them, in behalf of the town, unless the town shall otherwise vote in any special case.

BY-LAWS IN RELATION TO THE PREVENTION OF FIRES.

- 1.—It shall be the duty of every person who shall commence the erection of any building within the town of Hyde Park to notify the Board of Engineers thereof before he shall commence building the chimneys therein.
- 2.—All chimneys in wooden buildings shall be built of brick, stone, or other fire-proof non-conducting material. All brick flues shall be smoothly plastered *inside* with mortar from top to bottom or lined with earthen pipe, and shall be plastered *outside below the roofing*.
- 3.—In no case shall chimneys rest upon any flooring without a footing of masonry or iron supported by iron beams, having a secure bearing of masonry or iron at either end.
- 4.—All flues shall be topped out at least four feet above the roof of the building to which they belong. The brick topping out of chimneys shall not have more than two inches projection unless covered by a cap of metal or stone properly secured.
- 5.—Hearths of fireplaces or grates shall be laid upon brick or other trimmer arches, or upon bars of iron supporting a bed of brickwork.
- 6.—No wood-work of any kind shall be placed at a less distance than one inch from the outside brick-work of any flue. In no case shall a nail be driven into the masonry of any flue.
- 7.—No wood-work shall be placed at a less distance than one inch from any tin or other metal flue or flues, pipe or pipes, used or intended to be used to convey heated air or steam in any building, unless such flues or pipes shall be cased with metal, leaving a free circulation of air all around the same.
- 8.—No smoke pipe in any such wooden or frame building shall hereafter enter any flue unless the said pipe shall be at least twelve inches from either the floors or ceiling; and in all cases where smoke pipes pass through stud or wooden partitions of any kind, whether the same be plastered or not, they shall be guarded by either a

double collar of metal, with at least four inches of air space and holes for ventilation or by a soap-stone ring, not less than three inches in thickness and extending through the partition.

9.—The Board of Engineers shall examine into all shops and other places where shavings or other combustible material may be deposited or collected, and at all times be vigilant in the removal of the same, whenever, in the opinion of a majority of them, the same may be dangerous to the security of the town from fires; and direct the owner, tenant, or occupant of said shops, or other places, to remove the same; and in case such owner, tenant or occupant, refuses or neglects so to do, shall cause the same to be removed at the expense of such owner, tenant or occupant.

10.—It shall also be the duty of said engineers to take cognizance of all buildings in the town in which any steam engine shall be used, and of all buildings in town in process of erection or alteration, and to make a record of such buildings as in their judgment may from any cause be dangerous, and report the same to the selectmen forthwith. And whenever in the opinion of the majority of the Board of Engineers, any chimney, hearth, oven, stove, stovepipe, fire frame or other fixtures, or any camphene or other explosive or inflammable fluid or material, or whatever else may give just cause for alarm. should be altered, repaired or removed, they, the said engineers, shall forthwith notity and direct the owner, tenant, or occupant of the premises upon which the same are situated, to alter, repair or remove the same, as the said engineers shall direct. And in case such tenant, owner or occupant shall refuse or neglect so to do, the said engineers shall cause the same to be removed, altered or repaired at the expense of such owner, tenant or occupant. And any person who shall obstruct the engineers, or any of them, in carrying out the provisions of this section, shall be liable to the penalty here. inatter stated.

11.—The removal, extension or essential alteration of any ounding; also the rebuilding or repairing of any building which has been partially destroyed by fire, shall be subject to the same restrictions as are imposed by the foregoing By-laws on the erection of buildings.

PUBLICATION OF BY-LAWS.

The Selectmen shall publish these By-laws annually in connection with the town report.

PENALTIES UNDER THE BY-LAWS.

Every violation of any of the foregoing By-laws shall be punished by a fine of not less than one dollar nor more than twenty dollars, to be recovered by complaint before any trial justice in the County of Norfolk, or any other court having jurisdiction.

PROSECUTION UNDER THE BY-LAWS.

Any citizen may, and the selectmen, constables, and police officers shall, prosecute every violation of the foregoing By-laws, by complaint before any trial justice in the County of Norfolk, or any other court having jurisdiction.

LIMITATION OF ACTIONS.

No person shall be prosecuted or tried for any breach of the provisions of any By-laws of this town, unless the complaint for the same shall be instituted and commenced within six months from the time of committing such breach.

All By-laws or parts of By-laws of this town heretofore existing are hereby repealed, and these By-laws of the town of Hyde Park shell go into effect from and after their adoption by the town and their approval by the Superior Court or any Justice thereof.

Commonwealth of Massachusetts. Norfolk, SS.

HYDE PARK, November 17, 1886.

At a meeting of the legal voters of said town of Hyde Park, held in Everett Hall, on Wednesday, the seventeenth day of November, in the year of our Lord eighteen hundred and eighty-six, the foregoing By-laws were adopted by said town.

Attest:

HENRY B. TERRY, Town Clerk.

Commonwealth of Massachusetts. Norfolk, SS.

Superior Court, December Sitting, 1886, to wit: January 26, 1887. The foregoing By-laws are hereby approved.

By the Court.

REPORT OF THE SCHOOL COMMITTEE.

TO THE CITIZENS OF HYDE PARK:

The duty of supervising your schools and caring for your school property during the past year has received the attention of this committee, and we would respectfully submit the following statement concerning the present condition and future needs of the school departments:

Concerning the past year, it can be justly said that it has been a period of uninterrupted work, and we believe good results have been obtained.

ORGANIZATION OF THE COMMITTEE.

The Board organized at its first meeting, by the reelection of the officers of last year. Sub-committees were
then appointed and approved, viz.: High School, Messrs.
Johnson, Bunton and Mrs. Wood; Damon School, Mrs.
Wood and Mr. Lewis; Fairmount School, Mr. Lewis and
Mrs. Hanchett; Greenwood School, Messrs. Chick and
Johnson; Grew School, Messrs. Bunton and Chick; Butler
School, Mrs. Hanchett; Evening School, Messrs. Bunton
and Lewis; Industrial School, Mrs. Wood and Mr. Chick.
In October Mr. Bunton resigned as chairman of the Evening
School committee and Mr. Johnson was appointed to that
position.

SCHOOL ORGANIZATION AND STATISTICS.

HIGH SCHOOL.

Mr Jere M. Hill, master; Mr. Emerson Rice, Mr. George F. Free-129 man (till June, 1892.), Mr. William H. Cannon (since Sept., 1892.) sub-masters; Miss Anna W. Edwards, Miss Isabell Eaton, Miss Anna M. Linscott, assistants; Mr. George F. Freeman, instructor in military drill.

Graduates (four years' course).—Samuel E. Badger, Florence Elizabeth Barker, Frederick Herbert Bass, Edith Emerson Butler, Lucia Mabel Cannon, Henrietta Carrington, Mary Elizabeth Collins, George Albert Cutter, John Charles Dolan, Rolfe Marsh Ellis, Margaret Josephine Flaherty, Franklin Frederick Fowle, George Frederick Frost, George Marston Goodspeed, Edith Jrene Higbee, Emma Louise Helway, Charles Bradford House, Mary Alson Knight, Grace Ethel Lingham, Louise Thomas Marr, Florence Harriet Maxim, Rosa M. Morrell, Marion Trow Raynes, Lillian Alice Richardson, Gertrude Sanborn, William Rogerson Sparrell, Clement Bates Tower, Jr., Anna Gordon Vivian.

(Two years' course).—Arthur Russell Newell, George Horatio Raynes, John Leonard Sanborn.

	" Grew School,	1	00	
	Furnishing High School rooms,	534	18	
			\$39,298	41

A detailed list of these expenditures is printed in the Town Report, and the vouchers have been audited and are on file with the Secretary of this Committee. An examination of these will show for what purposes the money appropriated has been expended.

It seems proper to say that bills have been contracted in connection with the laboratory and furnishing at the High School, which have not as yet been approved, so that the apparent balances of these appropriations will be greatly reduced when all such claims are paid.

BUILDINGS.

The school buildings now in use by the town are large, and constructed of wood. With one exception, they have been used for more than twenty years, and the cost of keeping them in good repair is likely to increase from year to year.

We were advised during the year that the roof of the Damon building needed to be reslated; that in case of a storm which should cause ice to form upon the roof in any considerable quantity, the condition of the old slates was such that they were likely to come off in large numbers when the ice thawed enough to slide from the roof. The old wooden ventilators are in bad condition and need to be replaced.

Here, as well as in other buildings, the floors in some of the rooms begin to be much worn, the ceilings have been mended in many places, and in many instances the desks need to be replaced with new ones.

These are some of the indications that prudence will often require special appropriations to properly protect the town's school property and keep it in that condition desired for use.

IMPROVEMENTS.

During the past year the ceilings at the Grew, Fairmount and Damon buildings were thoroughly cleaned and retinted, the selection of colors being made under the direction of our well-known townsman, Mr. John J. Enneking, who generously gave us the benefit of his time and talent to the end that the work might be properly done and a harmonious blending of proper colors secured. All who have visited the rooms seem pleased with the results obtained.

At the Damon building an old furnace was replaced by a partially worn one from the Fairmount building.

Water has been introduced at the Butler School, a much needed improvement.

Steam heating was, by vote of the town, supplied at the Fairmount School and several hundred dollars expended in making needed repairs. The Local Committee represent the building in good condition.

The report of the Sub-Committee having charge of supplying the steam heating plant is hereto annexed:

At the Grew building the Exeter Machine Works made some changes in the plant, so that the room, which it was found difficult to warm at the time of our last report, gives us no further trouble. The Greenwood building has called for no extraordinary expenditure.

In the report of last year your attention was called to the crowded condition of the High School and a new building was recommended. At a meeting of the citizens held in June the town failed to adopt this recommendation, but voted to build another addition to the old structure. The work was immediately begun, and, although pressed forward with vigor by the Building Committee appointed by the town, could not be completed in season to open the High School at the usual time.

In connection with this addition the Committee of the town having the work in charge placed a steam heating plant in the building and discontinued the use of the old furnaces.

As the new structure was turned over to this Committee without furniture, the Selectmen, at our request, called a Town Meeting in November, to provide furniture and proper equipments for the new rooms. One thousand dollars was voted for that purpose, and the same has been substantially expended.

NEEDS.

In reviewing the recommendations of Local Committees as to special needs the coming year but one matter is found likely to call for any special outlay. We refer to the reslating of the roof at the Damon School building. If the condition of the roof is such as it has been represented, then a special appropriation of from \$500 to \$800 should be made to do the work.

In connection with this work, the old wooden ventilators should be replaced by galvanized iron.

The cellar at the Grew building should be plastered overhead and the bottom graded.

TEACHERS.

It is customary for Local Committees to enumerate such changes as have occurred in their respective lists of teachers. It will therefore be in order to name them here.

Very soon after our last report the High School sustained a great loss by the death of Miss Sarah L. Miner, who had for many years been one of its faithful teachers. Miss Miner was always at her post of duty and her work well done. Her influence upon the School was good, and especially so upon the young ladies under her charge. As a scholar she was thorough, but modest of her abilities. As a teacher she was painstaking, conscientious and loyal to the school. No efforts tending to its welfare and the success of her pupils were ever spared by her. As a mark of respect and appreciation, the High School was closed during the day of her funeral.

Miss Annie M. Linscott was appointed to the vacancy thus caused.

Mr. George F. Freeman, for two years a popular teacher in this school, resigned during the summer, and Mr. William Cannon was employed in his place.

Mr. Freeman's services as military instructor are still retained.

Resignations in the Grammar and Primary Schools may be stated summarily. Grew School, Misses Abby A. Sutherland, Belle D. Curtis and Edna Cherrington; Fairmount School, Miss Josephine P. Poole; Greenwood School, Misses Josephine E. Thompson and Jennie E. Sutherland. These vacancies were filled respectively: Grew School, Misses Emma M. George and Ada F. Whitney. Miss Howes was promoted to the XI grade and Miss Nellie M. Parson employed in her place in the XII grade; Fairmount School, Miss Marguerite G. Roe; Greenwood,

School, Miss Annie B. Davis of the VII class was promoted to the VI class and Miss M. L. Butland employed in the VII grade. Miss Lena B. Winter takes the XII class, taught last year by Miss Jennie E. Sutherland. These newly employed teachers are nearly all Normal graduates, and come to us well recommended from other fields of labor, and they are doing satisfactory work. These resignations occurred during the summer vacation, which enabled the Committee to carefully select new teachers, and begin the new year in September with the least possible injury to the course.

We believe the teachers in the employ of the town during the past year have been faithful to the interests of the schools under their instruction, and have used their best efforts to make them effective.

ATTENDANCE.

Upon the whole the attendance has been well sustained. At the Damon School an evil often spoken of still exists, and has during the past year been a source of great annoyance to the teachers, as well as an injury to the school. We refer to the fact that many children enter and are enrolled as pupils, attend a short time, and then, so far as we are able to learn, are absent and attending private schools for a few days or weeks, after which time they come again into our classes for a time. This makes the per cent. of attendance low and of course works injury to all so far as instruction is concerned. This is an evil that parents can correct by causing their children to be regular in attendance at either private or public schools. Every effort should be and is used by teachers and Committee to make the public schools serve all children entitled to attend and to keep the standard of work as high as possible but parents are expected to assist in every way possible to make the attendance of their children who enter the schools regular. If this is not done, the parent is responsible not only for the loss to his own children, but is also contributing to lower the standard of the whole class.

GRADUATING EXERCISES.

It has been the custom for many years for each Grammar School to have separate graduating exercises. Last summer the Committee decided to make a change, by way of experiment, and to assemble all Grammar School graduates in Waverley Hall, which is of ample size to accommodate all. Ninety-six candidates for diplomas occupied seats arranged upon the platform, with parts properly assigned to the several schools.

The exercises were prompt, well rendered and the result we believe was pleasing to all who witnessed the exhibition.

By this method our citizens had an opportunity of seeing all graduates of the Grammar Schools assembled, and thus were enabled to better appreciate the work of these schools. We hope the plan may continue in the future.

MUSIC.

This branch of instruction has been continued under charge of Miss Elizabeth M. Dodge, who, at the time of our last report, was employed on probation. Her work being endorsed by the committee on music, she was elected in June for the present year. She is doing satisfactory work. It is, however, a question whether the system now in use might not be changed with benefit.

COURSE OF STUDY.

No change has been made during the year. So far as we have observed, the course adopted last year with the change of text books then made has proved satisfactory. The work of the new course has gone forward smoothly and with benefit to the schools.

No change of text books has been made this year, except in one or two branches of the High school course.

STEAM HEATING.

It is not often that changes in school buildings involving equal expense are made as rapidly as those in our system of heating have been.

For several years many of our citizens advocated the introduction of steam for heating our large school houses, but the cost of steam plants as compared with a new furnace or two, now and then, to keep the old methods in tolerable condition always made a conclusive argument in town meeting.

When in 1887, as the result of an accident, a new building in the Greenwood district was required, the building committee, with some hesitation, supplied it with a good steam heating plant. The success of the system adopted was so marked that citizens having children attending at other buildings refused longer to be satisfied with furnace heat and as a result the Grew building last year and the High and Fairmount buildings this year were supplied with steam heating plants.

The plants at the several Grammar Schools are of ample capacity to fully warm the respective buildings. The new plant at the High School, whether from fault of the janitor or trom other cause, has not fully met the requirements during the extreme weather of the past winter.

The report of the sub-committee having in charge the furnishing the Fairmount plant is hereto annexed.

EVENING SCHOOLS.

We are sorry to say that these schools have not been as successful as is desirable. While they are intended to be of advantage to many persons who have been or are now unable to obtain educational privileges in any other manner, and our citizens willingly provide for all who desire to and can properly attend, yet they fail from some reason to have a large regular membership. This matter has been spoken about in previous reports of this Board.

Two schools were opened in November last, one in the Damon and one in the High School building.

The school at the Damon has had an enrollment of 86 pupils, but the average attendance to January 1st was but 31 scholars; this number became so reduced that the school was closed about February 1st. The reason for this result is not plain. Several causes may have contributed to it. The room used is but poorly furnished and but two teachers could be provided to instruct the school. As the work is wholly individual and no classification can be had, it will be seen that in the time allowed each evening but little attention could be given to each scholar. We are led to think from reports coming to us that many who attended cared but little for the benefits to be derived from the school, and by their conduct in and about the building made it so unpleasant that those who otherwise would have been regular in attendance abandoned the school.

It is to be deplored that the advantages offered by the town through these schools is not appreciated by all those who might attend them.

The centre school at the High School building has made but

little better showing. With an enrollment of 70 pupils it has had an average of about 20 scholars. Two teachers are employed.

It may be said that those who attend regularly are interested in their work and the schools are of much benefit to them.

Reading, writing, spelling and arithmetic are the branches most taught, although some desire to take up other branches and are allowed to do so.

The pupils vary from 14 to 35 years of age.

It may be desirable another year to better equip the room at the Damon building and should the regular membership warrant it provide more teachers.

It has been found that the best results are obtained by so dividing the work that each teacher shall have not more than fifteen pupils to instruct, and it may be advisable to adopt this plan with a view to better reach all who give evidence of earnestly taking up the work of the school. A vigorous discipline in and about the building should also be enforced that shall allow only those to attend the school who really desire to do the work assigned to them.

The evening drawing school has met with success. The report of the instructor is annexed and shows what has been done.

INDUSTRIAL SCHOOLS.

Schools for sewing and carpentry were opened early in July but as the High School building was in process of alteration the sewing school could not be held there, as has been the custom, but was changed to the Grew building. For some reason this school was not well attended and the committee in charge closed it after a few sessions.

The school for carpentry was well attended and accom-

plished good results. Fifty-eight boys took lessons during the term, the average attendance being twenty-five. Two classes were formed; one for the forenoon, of boys who had previously attended, while the atternoon sessions were devoted to beginners. The tools are becoming much worn and an appropriation for new ones is recommended by the subcommittee in charge.

MEMORIAL DAY.

This year the local G. A. R. Post notified us of its desire to detail some of its members to visit and address the various schools of the town upon the scenes and incidents of the late war, with a view to imbue the children with patriotism and a veneration for the flag.

As Memorial day is by statute and our rules a holiday, the schools were assembled in the halls of the several buildings upon the Friday afternoon preceding the 30th of May and addresses were made by members of the Post. The event was of great interest to the children and we hope the plan will be permanently established, so that all children may come to know and feel that they have an interest in the deeds of our veteran soldiers and that the Union, saved and perpetuated by the valor of the "boys in blue," is their heritage, even though their immediate ancestors did not serve in the conflicts of '61 and '65. Let every effort be made to impress the children with a love of our country. its constitution and flag, to the end that should clouds hereatter threaten, brave defenders will not be wanting to guard and perpetuate the rights and privileges which have been secured to them by their forefathers from 1776 to the present age.

COLUMBUS DAY.

October 21st was the day selected by the State author-

ities as the day for properly celebrating the 400th anniversary of the discovery of America by Columbus.

The several schools, by vote of the committee, made the day one of special exercises. Varied and interesting programmes were arranged by the teachers and local committees. The schools were assisted by Timothy Ingraham Post G. A. R., details from which aided in the exercises of the several schools.

These exercises were largely attended by our citizens. Addresses were made by local speakers, which added to the interest of the occasion and served to impress upon the children the lessons of the great event thus commemorated upon the children.

WORLD'S FAIR.

The matter of making an exhibit of the work of the schools at the World's Fair was considered.

In view of the fact that a comparatively small space for educational exhibits has been assigned to Massachusetts, and the great number of cities and towns which can be accommodated but partially if at all, we did not deem it advisable to incur any expense in attempting to make an exhibit which could but poorly represent the work of our schools.

As Mrs. Hunt has succeeded in having space assigned for a national exhibit of temperance work, our schools will find a place there to show their work in this branch of the course.

This seems quite proper, for Hyde Park may be considered the pioneer town in this movement, as it was the first to give temperance instruction a place in its curriculum of its public schools.

HISTORICAL.

This being the twenty-fifth annual report of the school

department, it seems quite proper to review the work of the past twenty-five years. We believe in no other way can a more accurate idea of our growth as a town be obtained.

The first annual report of this Board states: "When Hyde Park was incorporated there were within what is now its limits, eleven Public Schools. Four of them were in the Town of Dedham, five in Dorchester and two in Milton. As each of these towns had its own system of instruction and government, no uniformity in these respects was to be expected." At the present time we have within the same limits thirty-six Public Schools, with as much uniformity of system and government as seems desirable.

Twelve teachers were employed during the year of incorporation, two males and ten females. Now our schools require forty-four regular teachers, seven males and thirty-seven females. Besides these, we have four teachers in Evening Schools, three teachers in Industrial Schools and one teacher of mechanical and architectural drawing, employed during certain portions of the year.

The number of children in Hyde Park between 5 and 15 years of age, May 1, 1868, was 592, while the number found last May was 1924, while the number of pupils of all ages in the public schools in '68 was 547, the past year it has been 1863. The average attendance in '68 was 408, while the past year it appears to have been 1385. In making these comparisons the State Report is used for the early statistics which is based upon the year ending April 30, '69, while the later statistics used are based upon the figures given in this report for the year ending Jan. 31, '93.

When the town was organized the school accommodations must have been very meagre, and the population varied, as the record shows that a school was kept in the "old chapel on the Readville Camp Grounds, composed of primary and

Intermediate scholars and contained Irish, Dutch, German, Swede, Indian, African, French. English and American children, some of them knowing nothing of the English language." This "old chapel," with the old schoolhouse upon the site of the Damon building was Dedham's contribution to the school property of the new town.

A portion of the building now used by the High School, capable of accommodating four schools, with the Butler school building, came to us with a section of the town of Dorehester. The schools coming with the section of Milton occupied two rooms in a building leased from Mr. T. D. Weld, standing near the present site of Mr. A.-G. Worden's house. To meet the increased demand for school rooms, Mr. Robert Bleakie, during the summer of '68, erected a building containing four rooms on Walnut street, which he rented to the town until the end of the autumn term of '71, when the Central School (as this was called) was transferred to and became a part of the Grew School. To further meet emergencies the committee, in the summer of '68, purchased of Mr. Farrington a daguerrotype saloon for about \$300 and placed it near the schoolhouse then on the site of the Damon building. In addition to this the town erected a small school building there, and used the same without lathing or plastering. This building is now used for a chapel and stands just north of the Damon School yard. The town, however, abandoned these makeshifts there in 1870, when the present eight-room building was erected. At the time of the opening of the Parochial Schools in 1888 this building was fully occupied.

In 1871, the Fairmount and Grew buildings, each with eight rooms and a large hall were erected. The rooms of the Fairmount building are now all used and an additional room has been fitted from a portion of the hall. At

the Grew in 1884 an annex of three rooms was erected, making eleven in all, and all are now occupied by classes. In 1872 the Greenwood building was erected with eight rooms and a hall. The original structure was burned in July 1887 and the present building of similar size and style was immediately erected and occupied at the beginning of the spring term of 1888. These eight rooms, with one fitted from the hall, are now all occupied. The Butler building has been in constant use since 1884 for primary grades. With the exception of four rooms at the Damon building all of the accommodations provided by the town for primary and grammar schools are occupied, although quite a large number of pupils, properly graded, could be cared for in the various rooms of these buildings.

The appropriation for salaries, janitors and fuel in '68 was \$10,000 and about \$6,300 of this was used to carry the schools from May 1st to the end of the financial year in February 1869. Last year our appropriation for the same purposes was \$30,400. Grades were established as far as possible in September '68 but a regular course of study was not adopted until August 1869, which fixed a course of seven years, (2 primary, 2 intermediate and 3 grammar.) A few years later this was changed to a course of eight, years, and a curriculum adopted. About 1880 an attempt was made to increase this to nine years, but after about two years trial it was given up. In '74 but two grammar, masters were employed, each to have charge of two buildings, with competent assistants. One of these soon resigned, and the other, Mr. George M. Fellows, was given the supervision of all grammar schools. In '75 masters foreach building were employed, and this system has sinceprevailed. From September '85 to April '87 a superintendent was employed but after this trial it was abandoned.

With these exceptions the schools have been under the direct care of the committee, aided by a faithful corps of masters and teachers.

In the autumn of '68, ten scholars were examined and transferred to the private school of Mr. C. M. Barrows and their tuition for a High School course was paid by the town. At the beginning of the school year of '69 Mr. Fellows, then master of the Fairmount School, was given an assistant, and the scholars of the High School were under his charge until about January '70. Meantime the town had voted to establish a High School, and the hall over the store now occupied by Mr. A. G. Worden was hired and fitted for a High School room. Mr. Samuel Thurber of St. Louis, Mo., was employed at a salary of \$1,700 per annum; this was increased to \$1,900 after two years. In '72 the school was transferred to the hall of the then new Grew building, where it remained until '74, when the town voted to place it in the Everett building, where it has since remained, the building having been twice enlarged. High School diplomas were authorized in June '73, and Geo. W. Rollins, class of '72, Misses Agnes S. Adams and Carrie E. Walter, class of '73, were the first to receive them, November 8, 1873. From ten pupils in '68 to 206 pupils in '93 is a gratifying increase. The school, since it was established by vote of the town, has had but five principals: Samuel Thurber, Frank W. Freeborn, Wm. H. Knight, John F. Elliot and Jere M. Hill.

The records of this committee furnish evidence of great efforts in the early days of the town to place the school system upon a broad and comprehensive basis. Money was freely expended in salaries; and teachers of ability must have been available and no doubt were employed. Prior to '74 the average pay of the teachers was in excess of the

present rates, but in that year economy compelled a sharp reduction, and although increase has been made from time to time in some grades the former average has not been reached.

Not only in the matter of salaries was enterprise shown, but the call for accommodations was answered by the erection of four large school buildings, which have served the town with but small additions until the present time. There can be no doubt that the public school system is at the foundation of our political institutions. Where the intelligent performance of all public duties depends upon some intelligent executive and his selection rests with the mass of the people, then it must be necessary for the masses to be possessed of some knowledge of the duties required of the officer to be chosen if the affairs of a free people are to be properly administered. The duty of the schools is not merely personal in the fitting of a child for his own chosen pursuit, but is broader and means the protection of the state through an intelligent citizenship.

If the affairs of town, state or nation are to be well conducted, the people, sovereign in each, must be well educated in all that tends to make a good citizen. Should these matters be neglected and the children be allowed to come to manhood with its public responsibilities without mental or moral training, then would our constitution rest upon frail supports, and the capacity of our people for self-government be near to an end. With these thoughts in view we can appreciate the efforts made in the early days of our town's history in favor of good public schools. Our duty is plain! No effort should be relaxed that the child of to-day, but citizen of to-morrow may take his place well equipped with all that is required to make him intelligent and pat-

riotic in the performance of all duties which our country and its laws may devolve upon him.

Respectfully submitted,

CHARLES G. CHICK, Chairman.

Hyde Park, Jan. 30, 1893.

At a regular meeting of the Hyde Park School Board the foregoing report was read and submitted by the chairman, and it was thereupon voted that the same be adopted as the annual report of the full board.

RICHARD M. JOHNSON, Secretary.

REPORT OF SUB-COMMITTEE ON STEAM HEAT AT FAIRMOUNT SCHOOL.

To the School Committee:

The matter of supplying the Fairmount School building with steam heat having been referred to us with power, it is our pleasure to submit the following report of our action:

As soon as practicable we had the building and chimney inspected by Mr. Fairbairn, and gathered such information as seemed proper to enable us to protect the interest of the town in any contracts that might be made. The plant at the Grew School seemed to give good satisfaction and proposals were asked in the local and Boston papers for one similar in kind and of proper capacity to warm this building. In reply bids were submitted as follows:

Moody & Co.					\$1950
D. C. Higgins					2254 70
S Coffin & Co.					2639
W. E. Bartlett			. ,		2150
Bueskel & Co.					2208
A. B Franklin					2075
D. P. Gosline					3987 .
Lynch & Woodwa	ard				2145

As but \$2,000 had been appropriated to do this work none of these bids could be accepted without causing us to exceed the amount given us by the town for this purpose. This your committee would not do and recommended that all bids be rejected, which was done. Negotiations were then begun with parties with a view of obtaining a plant without exceeding the appropriations; these negotiations finally resulted in a contract with the Exeter Machine Works for a plant similar in all respects to that at the Grew building, for the sum of \$1,842. The contract called for a steel tubular boiler, tested and made tight at 150 lbs. hydrostatic pressure, with a certificate of inspection and a policy of insurance for one year; the plant to be of sufficient capacity to warm all the rooms of the building to a uniform temperature of 70 degrees, in all weathers, with all necessary connections and attachments. A bond was given, as required under the by-laws of the town for the faithful performance of the contract.

The old chimney proved of sufficient capacity and the expense of a new one was avoided. The work was done during the summer vacation, and has been carefully inspected by an expert in these matters, and we are satisfied that the work is well done. The capacity has proved ample during the severe weather of the past winter. Should it fail to meet the requirements of the contract, the Exeter Machine Works stand ready to make good its con-

tract and their bond can be held for any failure in this particular. We submit the following list of expenditures:

Exeter Machine Works, contract		\$1842	
Geo. H. Peare, labor and labor, .		27	30
W. U. Fairbairn, inspecting .		10	00
Boston Herald Co., advertising .		45	50
Hyde Park Times, advertising .		3	00 .
Norfolk County Gazette, advertising		2	5 0
Q. Dyer, hose	,	7	00
W. H. Plummer, labor and stock		9	50
Caleb Hall, labor and stock		3	50
			-\$1950 15
Cr.			
By amount of appropritaion,			-\$ 2000 00
Balance unexpended,			\$ 49 85

By authority of the full committee one of the old furnaces was transferred to the Damon School. Another has been sold to the Methodist church for \$25, and negotiations are pending for the sale of one other.

Respectfully submitted,

B

JOSHUA F. LEWIS, AUGUSTA L. HANCHETT, CHARLES G. CHICK,

Sub-Committee.

REPORT OF EVENING DRAWING SCHOOL.

HYDE PARK, Feb. 10, '93.

С. G. Сніск, Esq., Chairman School Board:

I herewith submit report of evening and drawing school to 1892 and '93.

During January, February and March '92 the attendance fell off quite perceptibly, especially during last weeks of the term; the Wednesday evening class suffering the most. With the approval of the committee on drawing school, the present term was announced to consist of two sessions each week instead of three, as heretofore. These sessions have been held on Mondays and Thursdays, the attendance being about equally divided. Mondays have been devoted to geometrical drawing, while on Thursdays elementary projection occupied the time; this class consists largely of young men who attended last term, most of them having an excellent record of attendance. The total membership is 47; of this number 18 are from last term; the largest attendance, 36; smallest, 16; average, 30. There is no falling off in attendance as yet, and the interest appears good. The drawing boards, so kindly furnished by the committee, are appreciated by the school. The substitution of gas for oil has given general satisfaction. We were pleased to receive calls from the committee and to note the interest taken by them in the school.

Respectfully submitted, CHARLES H. FOGG, Instructor.
